SPURVANCE

Cyber Security Course

Submitted By: Maryam Rehan

Mentor: Sir Abdullah

Assignment : 02

Question:01 Write down 3 real website addresses (URLs) you use. For each one, underline the real domain name and say whether it uses HTTPS.

NO	WEBSITE NAME	URL	DOMAIN	USE HTTPS
1	Google	https://www.google.com	google.com	Yes
2	Youtube	https://www.google.com	youtube.com	Yes
3	Instagram	https://www.instagram.com	instagram.com	Yes

Question 2: Identify Fake Website Addresses

Suspicious URL	Why Could It Be Fake?
http://jazzcash-reward.win/claim	Uses a suspicious reward-related domain and does not use HTTPS. It may be a phishing website designed to steal personal or financial information.
https://www.paypa1.com/login	Uses the number 1 instead of the letter l in PayPal. It is a lookalike domain that may be used to steal login credentials.

Question 3: Choose one thing you own (your phone, laptop or a social media account). Write one asset, one threat, one vulnerability, the risk, and one simple fix that lowers the risk.

Chosen Asset: Laptop

Element	Description
Asset	Personal files, documents and information stored on my laptop.
Threat	Malware or phishing attacks.
Vulnerability	Clicking unknown links or downloading files from untrusted websites.
Risk	Personal information could be stolen, files could be damaged, or the laptop could become infected with malware.
Simple Fix	Use updated antivirus software, avoid suspicious links and downloads, and keep the operating system updated.

Question : 04 In 2–3 sentences, explain the difference between a white-hat and a black-hat hacker.

White-Hat Hacker	Black-Hat Hacker
Works ethically with proper permission.	Accesses systems without permission.
Identifies vulnerabilities to improve security.	Exploits vulnerabilities for malicious purposes.
Helps protect systems and networks.	May steal information, damage systems or cause harm.
